Build your own football

- Draw your design on the net provided
- Cut around the outside of the net
- Cut along the red lines
- Fold the shape along every line
- Use glue to attach the tabs to the panels next to them. This can be fiddly but eventually your ball will start to take shape!

- Take a picture of your completed ball and share on Social media - remember to tag @BallsforAfrica
If you’re looking for a bigger challenge (although a less fiddly one) you can use these 6 larger pieces to construct a larger ball - and there’s even more room for your funky design!

Build a bigger football
